Care Partner Chronicles...

The Heart of Compassionate Care

At Touching Hearts at Home, we believe that care is more than just assistance—it's about building meaningful connections. This month, we had the privilege of supporting a client whose family needed extra help after a recent health scare. Feeling overwhelmed, they reached out, unsure of where to begin.

Our team quickly stepped in, offering personalized companionship and support to ease their worries. With a thoughtful match to a Care Partner who shared their loved one's interests, we provided not only the assistance they needed but also friendship and comfort during a challenging time.

February is a reminder to show love and care in every way possible. If you or a loved one could use a little extra support, we're here to help. Call us today—because care, connection, and compassion are at the heart of everything we do.

☐ **We Did It! Best of Home Care – Employer of Choice 2025!** ☐

We are beyond proud to be recognized as a Best of Home Care – Employer of Choice 2025 by Activated Insights!

Why is this a big deal?

This award is based entirely on feedback from our caregivers, recognizing us as one of the best home care employers in the industry! Activated Insights is a trusted leader in measuring caregiver and client satisfaction, and this honor reflects our commitment to creating a supportive, rewarding, and positive work environment for our incredible team.

To our caregivers—this award is for YOU! Thank you for your dedication, compassion, and heart. We are so grateful to have the best team in home care!

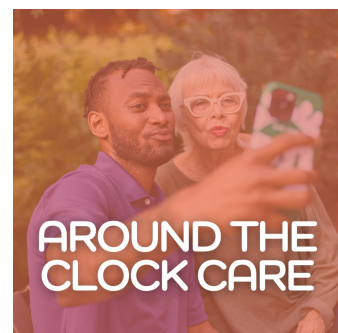

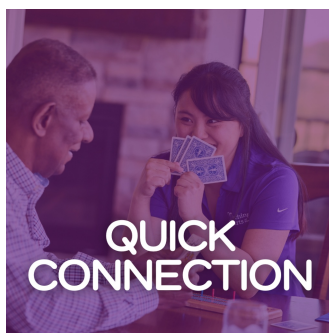

We proudly participated in #GoRedDay to raise awareness for women's heart health and show our support for the American Heart Association! Heart disease is the leading cause of death for women, but awareness, education, and early prevention can make all the difference. At Touching Hearts at Home, we're always happy to support meaningful causes that impact our community. The American Heart Association does incredible work advocating for heart health, providing resources, and funding life-saving research—efforts that truly change lives.
